Introduction

As successful blockchain industry applications and the value of cryptocurrency assets expand, the market of cryptocurrency-investing and intelligent speculation are growing rapidly.

We found a solution to build a Machine with trusted by user on distributed platform. First thing in mind can be started were record about financial transaction that everyone could trust.

Consequently, new cryptocurrency concepts are being introduced to bridge the gap between technical complexity and usability of Blockchain. This rapid growth brings more and more Blockchain Platforms increased problem solving activity. There is no need any more to prove anything, distributed ledger solves the problem of distrust. Transfer Data to the system about events in digital form.

Initial Coin Offering (ICO) are entering the market offering incredible new solution to certain targeted industries for greater efficiency and effectiveness.

Vision and Mission

The Vision of Dnote.online is to be global leader of real-time secured Notary System to Secure Blockchain permission based data sharing that simplifies the aiming to enable the general public to enter the world of modern digital confirmation of task/events existence with ease.

The Mission of Dnote.online system is to create best and easy to use blockchain platform technology to collect data in digital format and share the power of the data with each stakeholder in real-time.

Our Goals

The Dnote.online notary system is the world First Decentralized Notary System on Blockchain to taking Stone Age to secure blockchain.

Dnote.online offers a platform with blockchain technology they can provide specific value in multiple market.

Our Products

Dnote.online is aiming to enable the general public to enter the world which develops around Smart Contract, modern digital confirmation of task/event existence.

Developed various user interface to achieve the goal of a global solution, as follows:

1. Web Development or Web Interface, can be develop for user and also available.
2. IoT (Internet of Things) solutions are perform application and corporate system for integrating system on Blockchain.
3. Virtual Email Assistant or Mailbot has been developed and available for used to record e-mail in written communication.
4. Dnote.online platform will be provided in the form of a mobile application for Android and iOS on Playstore and AppStore.
5. Telegram, Twitter and Facebook messenger are developed to record information. They are convenient and common for users.

Token Allocation & Sale

The Sale of these coin will begin from 3rd Oct 2018
and all tokens must be purchased in
their BTC/LTC/ETH.

Who want to participate and be among the pioneers
that will be some of the first few to have privileges in
our next platform.

ICO stages will be officially commenced in OCT 2018.
ICO begin start from 3rd Oct 2018.

Allocation	Number of Tokens	Token Sale
Pre-ICO	300,000,000	300,000,000
ICO	100,000,000	100,000,000
Bonus	100,000,000	100,000,000
	Total	500,000,000 Dnote Coin

Future

We rewriting the notary system industry and also creating a more services that will use Dnote.online in People to Business, Business to Business and People to People to enter the world of modern digital confirmation of task/event and credit system.

The Principal value set to Dnote.online System to reduced effort and also reducing duplication of effort by working from decentralized risk profile in near future.

Conclusion

We recognize the significant complexity of blockchain technology and aim to build a solid, bug-free system. We have come a long way and evolved, but it can't keep up with the technology progress.

The Dnote.online team works actively on several fronts to ensure that we are building the correct solution that can bring profits to all user. The legal system is already beginning to accept blockchain as a method of trusted data storage, and once its reluctance is finally over, we will witness a revolution in numerous areas of our life.

We would create a more secure and safe world, this will expand our possibilities significantly. The recently developed technology of data storage in a public Blockchain is ideal to record facts.
